

I and my family enjoy the quality and choice that XM satellite radio offers. On long trips through the mountains and across the plateau areas of Eastern Washington AM and FM offer little choice, but XM is always there. As a paying customer I feel that the National Association of Broadcasters should not be able to dictate what I am permitted to hear. I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. One market should not be able to shut out another market.
